

**Research Group for
Biological Arms Control**

2020 Reader on Publicly Available CBMs

November 2020

About this Reader

The exchange of information under the Biological Weapons Convention (BWC) in the form of the Confidence Building Measures (CBMs) remains the only permanent transparency building tool of the BWC.

This Reader, as its forerunners, presents information on CBM-related developments and the data provided in the openly available CBMs of the current year. The CBM Reader aims to underline the importance of participating in the CBM data exchange as the only established permanent transparency tool for the BWC and to highlight the particular efforts of an increasing number of states to foster transparency by making their CBM submissions available to the public. The CBM Reader series is prepared as part of our efforts to increase transparency around bioweapon relevant activities globally. Such transparency is indispensable for building confidence in compliance with the BWC and must extend to all stakeholders including civil society. For more information please visit www.biological-arms-control.org/projects_improvingthecbms.html.

Development of the CBM regime in 2020

The last formal decision of States Parties with regard to CBMs dates back to 2011. On the 7th Review Conference in 2011 BWC States Parties decided to address CBMs in the 2012 and 2013 the Meetings of Experts and the Meetings of States Parties. It was aimed to discuss a possible update of the CBM forms (that date back to the year 1992) in the ISP, but BWC members did not agree on recommendations for a formal decision at the 8th Review Conference. Some States Parties, however, contributed working papers during the ISP and for the 8th Review Conference (see page 3). On the 8th Review Conference in 2016 Member States came to very few forward-looking decisions in general – and to no decision with regard to CBMs in particular.

Figures shown in this reader also illustrate the need for a debate on how a more active participation in the mechanism could be reached. The debates in the precedent ISP meetings and at the Review Conference show that these issues have potential for development.

Facts about the BWC and its CBMs¹⁾

BWC States Parties: 183

New BWC States Parties in 2020: None

States Parties with national contact points: 118

CBMs submitted in 2020: 75 as of November 25. 2020

Public CBMs in 2020: 29 as of November 25. 2020

First-time public CBM submission in 2020: None

Number of states having participated in the CBM data exchange in 30 years: 116

¹⁾ For reference see data provided by BWC Implementation Support Unit (ISU), accessible at www.unog.ch

CBM-specific publications in 2020

We could not find any publications on the issue of the CBM mechanism published in 2020.

For earlier publications, please check former versions of this reader at: http://biological-arms-control.org/projects_improvingthecbms.html.

Participation in the CBM regime in 2020

As on 25. November 2020, 73 BWC states parties had submitted their CBM (or expressed their intention to do so before the MSP). Therewith the long-time phenomenon that participation is relatively high in years with Review Conferences, but drops down significantly in the following year, does only appear in a moderated form. The overall participation in the CBM mechanism improved slightly over time. Since the beginning of the data exchange in 1987, the annual level of participation was never higher than 45 percent of the BWC states parties, in 2020 74 of the member states have submitted a CBM. In total, 116 countries submitted a CBM at least once. This means that 66 BWC states parties have yet to submit their first CBM declaration. Continuity in states' participation also remains weak: Only 37 countries have submitted a CBM in each of the past 10 years, and 25 countries have submitted a CBM only once or twice since 1987.

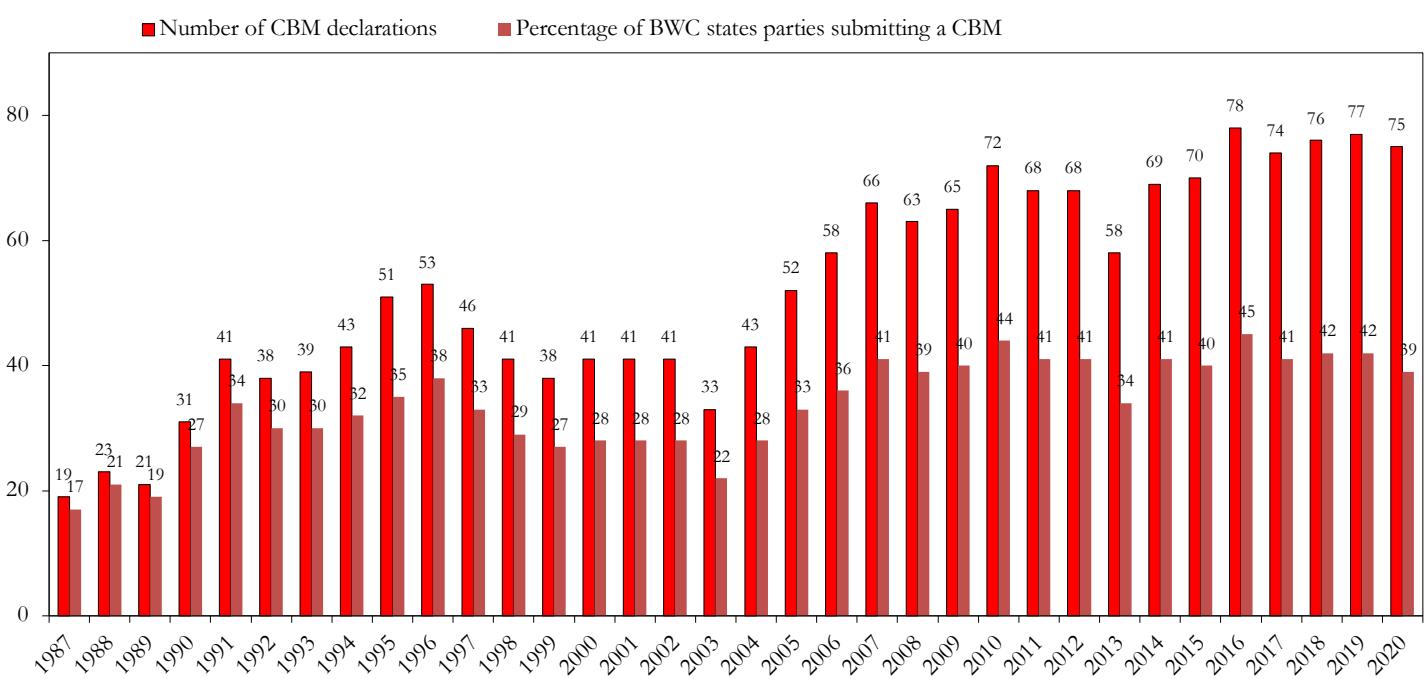

First time submission in 2020: Maldives (but not publicly available)

First-time public submission in 2020: None

CBM submissions in 2020 (States in bold made their CBM available to the public.):

1. Argentina	15. Czech Republic	30. Jordan	45. New Zealand	59. Singapore
2. Australia	16. Denmark	31. Kazakhstan	46. Nicaragua	60. Slovakia
3. Austria	17. Ecuador	32. Kenya	47. Nigeria	61. Slovenia
4. Belarus	18. El Salvador	33. Kyrgyzstan	48. Oman	62. South Africa
5. Belgium	19. Estonia	34. Latvia	49. Peru	63. Spain
6. Brazil	20. Finland	35. Liechtenstein	50. Philippines	64. Suriname
7. Brunei Darussalam	21. France	36. Lithuania	51. Poland	65. Sweden
8. Bulgaria	22. Georgia	37. Malaysia	52. Portugal	66. Switzerland
9. Canada	23. Germany	38. Maldives	53. Qatar	67. Thailand
10. Chile	24. Greece	39. Malta	54. Rep. Korea	68. Turkey
11. China	25. Hungary	40. Mexico	55. Rep. Moldova	69. Ukraine
12. Colombia	26. India	41. Montenegro	56. Russian Fed.	70. United Arab Emirates
13. Cuba	27. Iraq	42. Morocco	57. Serbia	71. UK
14. Cyprus	28. Italy	43. Myanmar	58. Seychelles	72. USA
	29. Japan	44. Netherlands		73. Uzbekistan

Figure 1. CBM submissions per year between 1987 and 2020 (Numbers in this figure may differ from numbers provided by the Implementation Support Unit. This is due to differences in counting states that were formerly part of other states, such as the former republics of the Soviet Union. This figure provides the actual number of CBM declarations submitted in the respective year.)

As of 25 November 2020, 27 countries have made their 2019 CBM declarations publicly available. All of the 27 publicly available CBMs can be found on the website of the Implementation Support Unit (ISU) (<https://bwcecbm.unog.ch/group/ecbm-portal>):

Australia, Austria, Belgium, Canada (in English and French), Cyprus, Czech Republic, Denmark, Estonia, Finland, Germany, Japan, Latvia, Lithuania, Luxembourg, Mexico, Netherlands, New Zealand, Portugal, Republic of Moldova, Romania, Serbia, Slovakia, Slovenia, Sweden, Switzerland, Ukraine, United Kingdom and the USA.

Belgium and the USA provided two separate versions of their CBMs, one for the restricted part of the ISU website and one for the public.

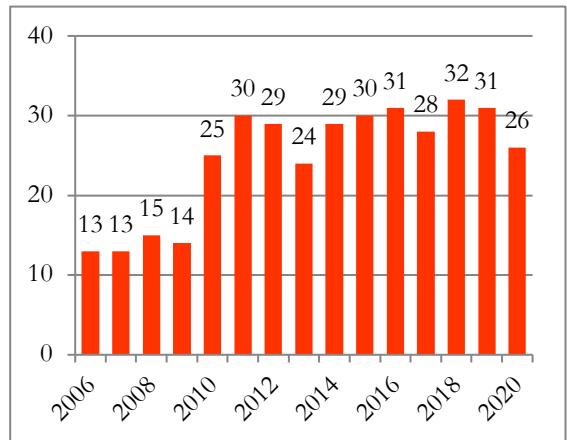

Table 1. Countries that made their CBM declarations publicly available, 2007-2020

Country	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019	2020

Total	13	15	14	25	30	29	24	29	30	31	28	32	31	27

As shown in Table 1 above 50 countries have made their CBM publicly available at least once since 2007. “(x)” indicates that states provided their CBM directly to the Hamburg Research Group. Many states make their CBMs publicly available in an erratic way. No explanation readily offers itself for why many states make their CBMs publicly available in one year but not in another.

Summary of data in publicly available 2020 CBM declarations

A summary of the data declared in the publicly available CBMs of 2020 is provided in the table below. More detailed information can be found in the Annex to this Reader. 36 maximum biological containment facilities were declared in publicly available CBMs in 2020, four of which were partially or wholly funded by ministries of defence. 16 of the 31 countries making their 2020 CBM publicly available declared having a biodefence programme; they provided information on 58 biodefence facilities. And lastly, 29 unusual disease outbreaks and 71 vaccine production facilities were declared in the 31 publicly available CBMs of 2020.

Table 2. Summary of data in publicly available CBM declarations, 2020

Form A, part 1:	Number of maximum biological containment facilities (BSL-4 or equivalent) declared.
Form A, part 2 (i):	Does the state party declare having a biodefence programme?
Form A, part 2 (iii):	Number of biodefence facilities declared.
Form B (ii):	Number of unusual disease outbreaks declared.
Form F:	Does the state party declare having a past offensive and/or defensive programme?
Form G:	Number of vaccine production facilities declared.
ND / NN:	“Nothing to declare” / “Nothing new to declare” indicated in Form X.

Country	Form A, part 1	Form A, part 2 (i)	Form A, part 2 (iii)	Form B (ii)	Form F (off/def)	Form G
Australia	4	yes	1	0	no/no	2
Austria	0	yes	1	ND	no/no	ND
Belgium	0	yes	1	ND	ND	0
Canada	2	yes	2	15	yes/yes	15
Cyprus	ND	ND	ND	ND	ND	ND

Republic of Moldova	0	yes	0	n.a.	NN	ND
Romania	0	ND	ND	ND	ND	4
Serbia	ND	no	ND	ND	no/no	1
Slovakia	ND	ND	ND	ND	ND	ND
Slovenia	0	no	ND	ND	ND	ND
Sweden	1	yes	2	ND	no/no	1
Switzerland	2	yes	10	0	no/yes	2
Ukraine	0	no	ND	ND	ND	5
United Kingdom	10	yes	1	0 ¹	yes/yes	5
USA	10	yes	26	14 ²	NN	10

¹ No outbreaks of human related disease, but there were three cases of monkeypox, which were known to relate to importation of disease to the UK through international travel.

² Two human disease events and 12 animal disease events.

ANNEX

The following table summarizes the data declared in **CBM Form A, Part 1**, of the publicly available CBM submissions from 2020 (covering 2019) and compares them with the information in publicly available CBMs from 2007 to 2020. The table provides the names and locations of facilities declared in CBM Form A, part 1, their containment levels, the year(s) they were declared, and whether the facilities were wholly or partly funded by ministries of defence (MoD). Grey cells indicate that there was no CBM submission. Grey cells with “n.p.” indicate that it was not made publicly available (either on the ISU-website or by providing the Hamburg Research Group with the CBM) in the respective year. “ND” indicates that the state ticked the “Nothing to declare” box in Form 0. “NN” indicates that the state ticked the “Nothing new to declare” box in Form 0 and provided no further information. “/” indicates that no data were provided.

The following table summarizes the data declared in **CBM Form A, Part 2 (ii)** and **Part 2 (iii)** of the publicly available CBM submissions from 2020 and compares them with the information in publicly available CBMs from 2007 to 2019. The table indicates the overall funding for the biodefence programme as declared in CBM Form A, part 2 (ii), and lists the names and locations of biodefence facilities declared in CBM Form A, part 2 (iii), specifying the year(s) they were declared. Grey cells indicate that there was no CBM submission or that it was not made publicly available in the respective year. ‘‘ND’’ indicates that the state ticked the ‘‘Nothing to declare’’ box in Form 0. ‘‘NN’’ indicates that the state ticked the ‘‘Nothing new to declare’’ box in Form 0. ‘‘/’’ indicates that no data were provided.

The following table summarizes the data declared in **CBM Form G** of the publicly available CBM submissions from 2020 and compares them with the information in publicly available CBMs from 2007 to 2019. It provides the names and locations of vaccine production facilities declared in CBM Form G, the year(s) they were declared, and the diseases against which vaccines were produced. Grey cells indicate that there was no CBM submission or that it was not made publicly available in the respective year. “ND” indicates that the state ticked the “Nothing to declare” box in Form 0. “NN” indicates that the state ticked the “Nothing new to declare” box in Form 0. “/” indicates that no data were provided.

Research Group for Biological Arms Control

The aim of the Research Group is to contribute, through innovative research and outreach activities, to the universal prevention of biological weapons development, production and use. The focus of activities is twofold. Firstly, the Research Group contributes to preventing the erosion of the universal bioweapons prohibition by opposing norm-harming activities. Secondly, it develops new concepts and instruments for monitoring bioweapon relevant activities and for verifying and enforcing compliance with the norm against bioweapons.
